Attribute Importer User Guide

1 Installation

Note: Please take a backup of your all Magento files and database before installing or updating any extension.

Download the extension file:

1. Download the Attribute Importer extension .ZIP file.

2. Copy and paste the files in to your Magento root folder/app/code/Synamen/AttributeImporter folder

3. Run upgrade command as specified : php bin/magento setup:upgrade

4. Run compile command as specified : php bin/magento setup:di:compile

5. Run deploy command as specified : php bin/magento setup:static-content:deploy -f

6. Clear the cache either from the admin panel or command line **php bin/magento** cache:clean

7. Now, you can see the **Synamen** menu in admin panel. Please go to **Stores -> Configuration -> Synamen -> Attribute Importer** and select **Enable** to Yes.

8. Change/Set all other options as per your requirements and save settings

NOTE : Make sure the installation is done from under the FTP administrator account. Otherwise make sure to set 775 permissions to the store root directory after the extension is deployed.

How To Configure

 \rightarrow In backend, Go to Stores >> Configuration >> Synamen >> Attribute Importer will display of configuration.

 \rightarrow Restrict Attribute Importer: Enable or disable extension from here.

 \rightarrow Import CSV: Browse to upload CSV with entered attribute codes and option values. For sample CSV file kindly look click download here..
